Are You a Service Bureau?

Do you want to be a reseller of the Mobilearth solution?

Mobilearth can be optimized to run in a Service Bureau environment that hosts multiple financial institutions. This lowers operating costs and permits you to provide all the mobile banking features you expect to your financial institution customers.

With the Mobilearth solution, you can provide any of the following to your financial institutions:

Smart Phone Applications

Mobile banking smart phone applications custom branded for your financial institutions. You get iPhone, Android, and Blackberry applications. Branch and ATM locators included. Your customers will have their financial institution's own branded app.

Text Message Channel

Mobilearth supports text messaging for a range of products from inquiries to payments. Please ask us about options that best fit your organization.

Mobile Web

Customers increasingly use web browsers on their mobile phones to surf the web. Mobilearth includes custom banking views for narrow or wide screen phones as well as enhanced views for smart phones.

PC Web Browser

Mobilearth channel for PC web browsers permits your customers to perform all banking and payment functions that they are used to using their PC. This channel is fully integrated with your customers' mobile phone channels using the same URL for access.
