

MobiBranch Feature Sheet

Empower your employees

INTEGRATED VIRTUAL BRANCH

Give your employees the tools they need to support clients outside of the branch. Remove location constraints and transform the traditional to digital.

You'll create a better banking experience for your clients and make your workforce mobile.

Streamline Processes

Create efficient workflows and streamline processes for increased accuracy and productivity.

MobiBranch is an all-in-one financial services application that can digitally transform your branch and enhance banking processes.

Take the Branch to Go

Enjoy the convenience of setting up your mobile branch anywhere and delivering quality service directly to your clients. Create a positive, memorable experience for your clients by providing world class in-person assistance with their institution needs. Your clients will remember your bank as the one that is always there for them—whenever they need it and wherever they are.

Keep Your Data Secure

Security is always at the forefront. MobiBranch is constantly updated with the latest security protocols to ensure your clients feel safe and at ease with out of the branch banking. Messages are encrypted end-to-end and information is never cached on the device. Confidential data is stored at the institution's private server.

Bank Smarter

MobiBranch revolutionizes the traditional way of banking and opens new doors to opportunities and business growth. Some key benefits of MobiBranch include:

- Increase brand awareness
- Make your employees as mobile as your clients are
- Lighten the paper load and go digital
- Multiple device access for flexibility
- Promote teamwork and collaboration
